- ❖ Available in eight colors

Fully deployed, view from inside your hurricane “safe-room.”

Front Entrances:

Doors are typically one of the weakest points in the envelope.

Preservation of your home’s envelope is paramount during a hurricane. Once a window or door is breached the envelope is compromised and the surging wind can lift your roof or blow out your walls; driven rain can flood your home.

Covering these openings with Cat 5 Hurricane Screens reduces the wind to a light breeze and the rain to a fine mist. Your home envelope remains intact.

Windows:

Roll-down with top and bottom mounting points.

Flush mount with side mounting points.

Inconspicuous mounting points along the sides of the window.
